

Industrial Box Thin Client

Categories : [Measurement, Instrumentation, Control & Automation](#), [Plant Construction, Engineering & Components](#), [Videos](#)

Date : 11. December 2020

The BTC14 industrial box thin client from Pepperl+Fuchs gives users access to applications and information that run on centralized systems—like servers—via Microsoft Remote Desktop. The rugged design enables reliable 24/7 operation and high installation flexibility. For example, the BTC can be installed in locked drawers for protection from unauthorized access.
