Date : August 28, 2020

Application area:

- bag types: Valve bags of paper, PE or PP-woven
- product type: Powders and fine-grit
- grain sizes: from 30 μ to 5 mm
- industries: Chemical, petrochemical, building material, food
- output: up to 350 bags/h

Advantages:

- most suitable for filling sticky and strongly adhesive products
- fast and efficient product change through saving sort-related machine parameters
- nearly residue-free emptying with innovative chamber discharge
- optimally suited for wet cleaning
